

A committee of warriors should visit the head office of the Northern Pacific Railway Co., and demand that Binford be given a place upon the time-table. We feel that we are entitled to it and that it is an injustice to our town that the name does not appear there. We surely give the company enough business to justify them in as much as giving us a place on the card. Let it appear there as soon as possible, gentlemen, and your booklet will be more complete. Commercial travelers are the ones who are materially inconvenienced by this oversight.
