

Messrs Martin Burke of Deehr and Ole O. Brodshaug of this place have purchased the right to manufacture and sell the Alberta Rack and Box Raiser. They have the exclusive right in the Binford and McHenry territories. The raiser is a patent device for raising heavy racks and grain tanks onto wagons and will prove a boon to the Dakota farmer. Many is the back that has been injured in lifting these burdensome boxes and racks and the advent of this device should be welcomed with joy among the farming community.
