

The largest load of lumber that ever went out of Binford, and Manager Jackson terms it the "banner load," was hauled from here last Monday. Of course Martin Burk hauled it for that big barn of his, for he does not feel small himself, he has big horses (some that he has taken up and is waiting for the owner to call for) and that load contained 4013 feet of lumber. Please do not regard this paper as a pipe-dream recorder, but if you have anything bigger than that load of lumber, it is your turn.
