

MRS. BURNS VERY ILL

Mrs. Peter Burns was taken suddenly ill Tuesday morning and Dr. Truscott was summoned to the home. Her case has proven very serious and an operation is deemed necessary. Dr. Wheeler of Grand Forks will perform the operation today and will be assisted by Dr. Truscott of Bismarck and Dr. Beak of Lakota. We are informed that this is one of the most serious of cases and it is to be hoped that the operation will prove successful. The report is quite general that Mrs. Burns is suffering from blood poisoning in her hand but we are informed by the physician in charge that this trouble is passed and her hand practically cured. The trouble from which she is now suffering is a far more serious matter and is not in any way traceable to the blood poisoning.
