

Unnecessary Expense.

Acute attacks of colic and diarrhoea come on without warning and prompt relief must be obtained. There is no necessity of incurring the expense of a physician's service in such cases if Chamberlain's Colic, Cholera and Diarrhoea Remedy is at hand. A dose of this remedy will relieve the patient before a doctor could arrive. It has never been known to fail, ever in the most severe and dangerous cases and no family should be without it. For sale by Geo. Lockett & Co.

"Make Hay While the Sun Shines."

There is a lesson in the work of the thrifty farmer. He knows that the bright sunshine may last but a day and he prepares for the showers which are so liable to follow. So it should be with every household. Dysentery, diarrhoea and cholera morbus may attack some member of the house without warning. Chamberlain's Colic, Cholera and Diarrhoea Remedy, which is the best known medicine for these diseases, should always be kept at hand, as immediate treatment is necessary, and delay may prove fatal. For sale by Geo. Lockett & Co.

LOCAL OVERFLOW.

A large lot of calicos 7 and 8c kind, 5c yard while they last.—O. S. Gunderson & Co.

Sever Pritz, formerly of Shepard and Cooperstown, writes us from York that he is now located at that point and requesting us to send the Times to him at that address. All right Sever, thy will be done.

K. G. Flaagan received a new Huber threshing outfit Tuesday and unloaded it yesterday. Things are getting in readiness for taking care of our big crop this year. In a few weeks with favorable weather threshing will be in full blast.

Some of the building operations in Binford were slightly interfered with yesterday on account of rain, but when the weather is clear again the carpenters will come out and get as busy as a bunch of black birds in a corn field. For, it has been written, Binford must grow and in accordance there with Binford will surely grow.

The Binford school will open about September 10th for a nine months

term. Miss Calahan of Minnesota, who taught the last term and gave such entire satisfaction has been secured for the coming term, and the parents are thus assured that their children will get first class instruction. All children old enough to attend school should be in readiness for the opening day and remain in school during the entire term. Some of the older children will not be able to attend until the busy season is past when there will be a large enrollment of scholars from the country.

The editor accompanied O. S. Gunderson on an auto trip to Pekin last Friday. The new town is coming along under a steady and healthy growth, which means that it is more sure to become an important business center than if it were boomed as are some other new towns. Pekin is located in the midst of a good farming country and will make a good town. Tolna is also said to be a promising town, but we have not visited that place yet and can not say much concerning it except that we know it is located in the midst of a fertile region which should make it a prosperous town in time.

The Sabbath School established here several weeks ago is prospering nicely. There are a few families who have manifested a lively interest in the work, and they are hoping for others to avail themselves of the opportunity to join in this feature of religious observance. All are invited to attend and take part in the work so no one should feel that he or she is not wanted there. There have been some fruitless attempts made to start Sabbath Schools here before, but because they have all failed is no reason why we should fail this time. We do not expect to make a failure of it this time for everyone who attends is deeply interested. Come out and help along with the work. This means you.

T. J. Riley, a former resident of Nelson County, arrived here from San Francisco last week. He says that he had been a resident of that city five years prior to the time of the earth quake which destroyed his home and all his children and grandchildren. His wife had died several years ago and he is now alone in the world
