

Little Irene, the five year old daughter of Mr. and Mrs. Charles Carlson has suffered considerably of late from an abcess in her throat, resulting from her recent attack of scarlet fever. On Thursday last, the abcess was lanced and the throat has been much improved since considering the fact that the case is complicated with kidney trouble also resulting from the fever. Altho the child is badly affected, yet her condition at this time is not considered serious, and it is hoped she will recover in due time.
