

ception on their return home again.

Dr. Brimi came up from Coopers-town, Friday to investigate some reported cases of small-pox, reported to him by Dr. Truscott. Dr. Brimi is superintendent of the Board of Health, and one man was ordered to remain in side of his room and to isolate himself from all society because of the disease. This man was George Johnson, but as he is now out of danger and is past the point of spreading the disease, he has been granted his liberty. Ed Goffe also was a victim, but is practically out of danger. At this writing there are no other cases reported.

Our jail was virtually dedicated
