

## ACCIDENTAL SHOOTING

Albert Leiningar met with a very painful accident last Saturday, as a result of handling a shot gun which he did not thoroughly understand. It was a repeating shot gun and Albert and his father were handling it together. They had ejected a shell and a loaded cartridge had been inserted in the barrel thru the automatic action of the gun, but they were not aware of the fact that the gun was also cocked by the same process, and thinking the trigger securely set, one of them accidentally discharged the load and the entire charge of shot penetrated Albert's foot, making a hole the size of the shell clear through. Dr. Truscott was hastily summoned and went immediately to the home which is about eleven miles south of here, and was accompanied by Druggist Lockett to assist if needed. The doctor picked out all the shot that was lodged in the foot, and found considerable shot that had gone through the foot and lay inside of the shoe. This accident will cause Albert to be laid up for a while, but at the present time we are pleased to state that he is getting along nicely.
