

William Rickford returned Tuesday from Fargo, where he has been under medical care for the past four weeks. He had a bad case of blood poisoning complicated with internal disorders which required close attention on the part of two doctors for some time. He was not confined in a hospital but instead was at the home of Mr. and Mrs. Hugo Gratius, Mrs. Gratius being his sister. He reports that he is greatly improved but is not entirely well yet and was not supposed to come home just yet, but he had been away so long that he concluded he could not stay longer, so he broke away and came home. We hope that his ailment will soon be overcome and that he will again be able to enjoy good health as before.
