## The Kiddies.

The increasing respect for children is beginning to make itself felt on all sides. Little boys and girls are no longer put off with careless words and second rate toys. They are studied with constant thought by parents, scientists devise their playthings, and literary and artistic "celebrities" make the books. Of these things modern children are not unappreciative. If they are growing hypercritical in some directions they are becoming very tolerant in others, and not infrequently they understand their parents' little shortcomings much better than do those humiliated "elders" themselves. —Philadelphia Record.
