
New Ball Grounds.

Work has been started on the new ball grounds this week. Men and teams are busy packing the loose ground, after which it will be dragged and sown to grass seed and then packed again. The knolls are being "peeled" off and the low spots filled in. As soon as it is available a heavy engine will be run over to put on the finishing touches and to pack the ground so the field will be made as "fast" as possible. It means a lot of hard work, but when it is done something worth while has been accomplished, and Binford will have a ball park that they can call their own, and one which will be a little bit ahead of anything in the neighboring towns.
