

many men is.

A paper has been circulated among the citizens this and last week, by I. I. Braaten, asking for subscriptions for building a band stand. Mr. Braaten met with a great deal of success--something near \$100 being pledged. The stand is being erected on the railroad right-of-way, on the ground that was proposed for a park. It is octangular in shape and is made with a roof. The stand is a peach and one that the citizens and band boys can be proud of.
