

The Binford Farmers Club held their regular monthly meeting yesterday afternoon and the session was marked with considerable enthusiasm and good attendance. The discussion of the tenant and landlord took up a good part of the program, and though the problem was not thoroughly threshed out many good points were advanced which will have some effect in solving this proposition. Secretary Arneson read two communications from the United States Department of Agriculture and the North Dakota Agricultural Experiment station touching on this point which contained some good advice on this question. The Times will print these letters. It was decided to hold a picnic some time during the summer at Red Willow lake and a committee composed of F. G. Lewis, O. G. Arneson, M. D. Leininger, Henry Asmus and D. A. Goplen was appointed to arrange for this meeting. It is planned to have some good outside speakers in attendance, music and some other features that will be interesting and instructive. The exact date will be announced later.
