

# IMPROVEMENT DAY IS PLANNED

---

**Every Man in Town is Asked to  
Be Out With Pick  
and Shovel.**

---

Next Monday, weather permitting, every man in Binford, who is capable of handling a pick or shovel, is asked to join in the work of improving the roads leading to town. This was decided at a meeting of the Commercial club Monday evening, and it means all of us.

This is a novel scheme for road improvement, and one that is not practiced all over, but if every one takes the interest that they should, there is no question but what the best kind of results will be obtained.

The members of the road committee of the commercial club have had talks with the farmers and from what they can learn, there is going to be a lot of good work done on the roads this year, and the suggestion to hold an improvement day by the citizens in town to assist with this work met with genuine favor by the club members.

It is planned to have a party go over all the roads leading here, and pick out the rocks in the road and make other improvements that they can. This, perhaps, won't be an easy undertaking, but it can be done, and there is no question but what our farmer friends will appreciate it.

So, on Monday shoulder your pick or shovel and join the gang. This is no time for shirking.
