

BINFORD SCHOOL OPENED MONDAY

Individual Drinking Cups Installed—First Year High School Course Added.

The Binford schools opened Monday under the most favorable auspices. The attendance the first day was as large as could be expected and is increasing every day. Already several from out of town have enrolled their names and joined the band of knowledge seekers. Fifty-one were enrolled the first day—divided as follows: Primary department, 26; intermediate department, 14; grammar department, 11. Miss Mildred Pomeroy will have charge of the seventh and eight grades and first year high school work; Miss Bertha Sheffield, the fourth, fifth and sixth grades, and Miss Ora M. Lowe, the first, second and third grades,

A noteworthy and commendable feature this year is the installation of individual drinking cups. The old germ-laden public drinking cup is fast being relegated to the junk heap in many of the schools in the state, and is being replaced by sanitary fountains or individual cups. The completion of another room and the addition of the course in first year high school work is also a progressive step.

The able board of managers have set the wheel in motion, and we believe this year's term will prove to be the most successful in the school's history.
