

BUILDING ADDITION

Business of Binford Auto Garage Increasing Steadily.

Carpenters are busy this week building an addition to the garage which the increase of business has made necessary, the present accommodations being inadequate for handling the trade.

With the building of the new part, Mr. Johnson will make the garage up-to-date in every particular. A cement floor will be put in addition, and many other improvements that will facilitate the handling of his business.

Mr. Johnson has built up a splendid patronage since coming here, and we are glad to see this improvement as he has worked hard to make it a paying institution and a credit to Binford, and he is deserving of success.
