

P. E. Peterson has installed a 40 gallon hot and cold water plant in his barber shop this week, and it makes a decided improvement over the old copper tank that hung on the wall. The plant installed is something new and strictly up to date. It is much handier than the old method and is also more sanitary, besides it adds greatly to the appearance of the shop. "Gull" certainly believes in keeping up with the times, and if need be will step a little ahead. He now has one of the most modern shops in the state and his patrons will congratulate him on his progressiveness.
