

# HOUSE WIRING NEARLY DONE

---

Work of Installing Electric Light  
Wires is Being Pushed  
Rapidly.

---

Electrician Terry and H. B. Hanson are near the end of the work of wiring up the buildings of Binford for electric lights, and about ten days more will complete the job.

M. S. Hyland, who has the contract for installing the plant, was here Monday and made arrangements to commence his work the latter part of the week. All the material has arrived with the exception of the switchboard and poles, but these have been shipped and will be here in a few days. Work on the cistern and concrete base for the engine is under way.

The matter of street lighting has not been decided as yet, some favoring the white way and others the over-hanging lamps.

The plant will be ready for operation and the juice turned on about the middle of June.
