

ELECTRIC LIGHTS A PROBABILITY

**Meeting This Forenoon Was Largely
Attended and Enthusiastic in
Favor of the Move.**

M. S. Hyland, a dealer in electric light plants, of Fargo, was here this week and has been interesting local people regarding the installation of an electric light system in Binford.

H. B. Hanson is the promotor of the project and he informs The Times that he has received much encouragement from the people whom he has interviewed.

A meeting was held this forenoon at the First National bank, and Mr. Hyland gave information as to the cost of installing and operating.

Mr. Hanson will make a more complete canvas of the town and if given the proper support there is a probability that Binford will be electric lighted within a few months.
