

McHenry Light Plant Soon Ready.

Tribune: McHenry's electric lighting plant is fast nearing completion and Mr. Schmidt, representative of the Dakota Engineering and Contracting company, states that, unless unforeseen delays occur, the plant will be in operation by Easter Sunday. Those in charge of the work ask that all who care to have the wiring of their home and business places ready that time should work without delay.

It cannot be gain-said that in the acquiring of an electric lighting system, McHenry has taken a progressive step; a step which will lead to greater pride in our city, greater interest in its upbuilding and a greater faith in its growth and prosperity. Such improvements to a town are what good clothes are to a man.

Those who opposed the movement at its inception and who were in the minority should join forces with the majority, make every use of the convenience thus at the start insure the success of this municipal investment.
