

## To the General Public.

In view of the great prevalence last year of Infantile Paralysis in the state with its high mortality and the crippling effects on those who survived the disease, every precaution should be taken this year against another invasion of similar nature. The chief barrier against disease and especially Infantile paralysis is that of sanitary cleanliness. The State Board of Health, in order to reach the masses of the people, take this occasion to notify and order every householder take special precautions towards screening against flies, removing from your premises all garbage, dirt and manure frequently and otherwise maintaining his house and premises in a sanitary condition at all times.

By order of State Board of Health.

William Langer,

Attorney General, President.

A. M. Call,

Vice-President.

C. J. McGurren, M. D.,

Secretary.
