

## **Pekin Will Have Electric Lights.**

**Pekin Budget:** Pekin will have electric lights. This is the news that is now spreading about our town and is the topic of the day. It is no longer a surmise, but is an assured fact, and the work installing the poles and wires will be commenced as soon as arrangements can be made for help and material. The plant will be put in and controlled by O. S. Houge, and will be extended from his manufacturing plant. It will be of such capacity that there will be no remodelling in the future, at least not for a number of years. Just as to particulars we are unable to give any at this writing, but will go more into details when the plant is ready for work. It is expected that the plant will be working in six weeks, or at any rate by Nov. 1. Nine street lights will be installed, and there will be no more dark streets with us after the first of November. It should be the pride of every citizen of this town to help this move along and place our town on an equal footing with many a larger one as far as the lights concern. Even if our town is not the largest, still let us remember that it is our town.
