

Otto Pritz, who has been confined to his home and bed for nearly three months, with typhoid fever, has recovered completely and was downtown for the first time Monday. He is looking a little "peaked" but expects to regain his lost weight soon.

Otto has had a severe time of it and at times his condition was so critical that his life was despaired of, and had it not been for his strong constitution there would have been little hopes for his recovery. As it is, his many friends are delighted to see him again and extend greetings.
