

We notice by the Jamestown Alert that B. H. Stoddard, while in that city recently, purchased three Buick automobiles from the James Rivea motor Co. We are informed that Mr. Stoddard will go into the automobile business here and if satisfactory quarters can be obtained he will put in a garage and general supply house. We understand he will secure the local agency for three makes of machines and with the garage in running order this will do much towards the furthering of the use of automobiles in this section of the country and will also be of great benefit to those who already have become automobile enthusiasts.
