

## School Notes

State Inspector Hayward visited the several departments of the school on Wednesday, December 11, for the purpose of classifying the High School according to law, thus securing state aid for our school. He reports efficient management and a high grade of work and says that the only objection to classification is the poor system of ventilation. As soon as this can be remedied the school will be classified.

Last week another teacher was added to our force to relieve Miss Cravath and Miss Baillie who had more work than they could do well. Miss Bond, the new teacher, is an experienced young lady who has taught several terms of school in this state.

Due to the liberality of the school board we are now enjoying some fine piano music. Several entertainments will be given by the school during the year to help pay for the piano.

The boys and girls are anxiously waiting for the completion of the new town hall, so that they can play basket ball.
