

Dr. T. J. Caldwell left for Miles City, Montana Sunday evening. He expects to look that country over with a view of purchasing some land in that locality providing he finds something that would prove a good investment. From there he will go north to Havre, Chester and tributary country. Besides going on matters of real estate investments he considers the recreation derived from such a trip of immense value as a relief from the strenuous life incident to the practice of a physician in a country town. The doctor expects to return in a week or ten days to again take up his extensive practice.
