

Emil Nelson and A. A. Hoffman returned from Montana last week Friday where each has filed on a half section of land. It is said the location is a good one and well adapted for all agricultural purposes, provided they get sufficient rainfall. Their claims are within twelve miles of the Canadian boundary and eighteen miles north of Chester, Mont., on the Great Northern. A new road is soon expected to be built and in all probability it will traverse through or near their land. To the west lie rich beds of coal and granite and the country appears to have a great future for permanent settlers homes.
