

Mrs. Hopwood was quite seriously burned about the face and hands on Tuesday afternoon by gasoline. She is the cook at the Windsor hotel and on this afternoon was cleaning some clothes with gasoline and set the pan on top of the stove, supposing there was no fire in it. In this she was mistaken and the gasoline ignited, burning her face and hands quite severely. The burns are not deep but it will be several days before the sores will heal. Fortunately no damage was done to the building.
