

Mrs. Elihue Mosher, of Hannaford, gave birth to twins—both girls—last Friday morning. Dr. Bergstrom was in attendance and he had a very serious case. Mrs. Mosher suffered from eclampsia—or childbirth convulsions, and was in a very precarious condition, but Dr. Bergstrom handled the case in a very scientific manner. Saturday a consultation was held by Doctors Bergstrom and Wanner, of Cooperstown, and Dr. L. E. Benson, of Valley City. The doctors agreed on Dr. Bergstrom's treatment of the case and we are told that Mrs. Mosher is improving fast.
