

Mrs. Lon Rhodes met with a very painful accident Sunday. Mr. Rhodes had put up a barbed wire to keep his horses in an enclosure and Mrs. Rhodes did not know of the fact. She started out to take a bicycle ride and started for the gate supposing there was no obstruction. It was down grade and Mrs. Rhodes did not see the wire until she was too close to stop when she tried to turn and grabbed the wire with her hand, her heavy weight causing the wire to be pulled through her hand and cutting it up terribly. Mrs. Rhodes was picked up in a fainting condition and the injured hand dressed as best could be and she was brought to town and had the injured hand properly attended to by Dr. Brimi. We hope no bad results will follow from the injury.
