

A serious accident occurred at Finley last Friday that may result in death. While Tommy Hogan, a lad of 13 years, was riding a broncho the horse ran away and dashed into the barn. The boy's head struck against the building with sufficient force to crush the skull in a horrible manner, spilling his brains upon the ground. Dr. Philip was sent for and with the assistance of Drs. Wagar and Cummings, exerted all medical skill to save the boy's life. At this writing he is still alive. His mother conducts a hotel in Finley.—Hope Pioneer.
