

A number of farm tools consisting of chisels, punches, pliers, pipe-wrenches, screw-drivers, etc., were found under a shock of grain in one August Palm's fields a week ago. A number of the owners of this property have called at Palm's and identified their property but a number of tools still remain uncalled for. Mr. Palm is anxious that this property be returned to its rightful owners. While there is some conjecture as to who is the perpetrator of this theft, no steps have yet been taken toward punishing the culprit.
