

Rygg Is Very Much Alive

Lawrence I. Rygg gave the people of this community a genuine thrill Sunday afternoon when he arrived in town, very much alive, despite the report to the contrary, which was circulated recently. It is true he had been sick, at times seriously, since April, and was in a hospital at Fargo a part of that time. While he is somewhat lighter in weight than before his illness he is gaining and expects to be in normal health in the course of time. It is a mystery how the report referred to became started, but it is a genuine pleasure to everybody to learn that it was a false one.
