

One day last week Joe Eben tier and George Young noticed in front of the hotel what ap peared to be an unusually large lizard but which was pronoun ced an alligator after closer ob servation. It seems that a party in Benson county had three small alligators, two of them getting away during Au gust. It is the supposition this was one of the two and that it was headed for its natural en viron in the southland. Mr. Young says that judging from its size the 'gator was about two years old.
