

# Oil Machinery Has Arrived

Wednesday evening a quantity of machinery for the oil well arrived at Glenfield. The shipment consisted of engine, boiler, rotary drill, casing etc., and came from Oklahoma. The 112 foot derrick is on the way and when it comes work of erection will start at once. The delay was due to the failure to secure the right kind of flat cars necessary for loading and unloading heavy machinery.

It is confidently expected that drilling will start in about a month.
