

1 Here is the way Phil Lampert-
has his wheat crop figured out
for this year, and it is the ex-
perience of practically all of our
farmers. His share of the crop,
5.5 bushels per acre, amounted
to \$3.13 per acre at 57c. The
expenses were, per acre, plowing,
\$1.50; dragging 25c; seeding 50;
cutting, 75c; twine, 18c; shock-
ing, 18c; thrashing, 55c, making
a total of \$3.91, or 77c more
than he realized for the grain.
