

## School Notes

Two new studies have been added to the high school this year, they being domestic science and manual training. During the summer vacation the school board had the basement put in shape for the manual training class, and the class began their work in this line as soon a school reopened. The domestic science began their work during the beginning of the second month owing to some delay in books and other articles which were needed for the class. The class is instructed by Miss Jones. Prof. Chamberlain has charge of the manual training class. Both studies are well taken by the pupils and are proving beneficial to all.

The students of the high school, seventh and eighth grades will have no excuse in the future for not knowing what is going on in the world for Prof. Chamberlain has sent for several copies of Current Events, and the students of the above mentioned grades take the happenings of the day and discuss them every Friday morning. Several complaints have been made that the children in this age are studying too much about the happenings of three or four centuries ago. For the benefit of the children the professor decided to get the Current Events so that the scholars might learn about the old and new events.

**NOTE**—The editor expects to be able to obtain notes of the school for each week, which will be a benefit to the school and also the readers.
