

New Store At Clements- ville

One of the new firms to be established at Clementsville will be in charge of Frank L. Papstein of Jamestown, who will be the resident manager and one of the incorporators. Zimmerman Co. of Jamestown also will be interested with Mr. Papstein in the business. Mr. Papstein started building Monday. He is an experienced man in the business. He is largely interested in lands at Clementsville, well acquainted, and the success of the business venture is practically assured before the doors are opened for business.

The new 32,000 bu. elevator was completed Saturday when it began receiving grain for shipment. Large quantities of grain held awaiting the arrival of the Midland, have been shipped out. Some of the grain was loaded directly into cars while a portable elevator was used to care for many thousand bushels. A rich territory is tributary to Clementsville and thousands of bushels of grain have been held from market in other shipping points for shipment from here.
