Last Saturday was one of the warmest days of the summer and the mercury run up to about 90 in the shade. The heat was intense, without a breath of wind, excepting in the evening when the sky became overcast with dark clouds but only a few drops of rain fell. The wind shifted into the northwest and remained there for three days which cooled everthing off nicely.

A New Delegation Has Arrived

A new delegation of Servians with their gaily painted covered wagons, crowded with the swarthy foreigners, men, women and children brightly garbed and all unwash, numbering 100, some recently from Servia, and others from Kafkas and Oklahoma, have joined the Servian colony two miles west of Spiritwood, twenty families pitching their tents on the old Adam Schlichter farm, purchased by the Uwanawich family. The new comers have recently purchased the John Schmitt farm. They brought considerable foreign gold. All are close bargainers and the women proficient in fortune telling.

The twine situation is becoming a serious thing and it is really the fault of the farmers that do not order when their dealers come around to them soliciting their order. It would be a great deal better if they would carry over 100 lbs. extra than 100 lbs short at harvest time not knowing where to get any.

MORE TERRITORY.

"I envy you," says the very thin man. "I wish I had your weight. Here I am, a skinny, dyspeptic creature, suffering half the time with stomach ache!"

"Envy me!" chuckles the very fat man. "Why, what if you do have the stomach ache half the time? Think what a little bit of a stomach ache you can have. Now, when I have the stomach ache it amounts to something."—Life.

REDUCING HATPINS.

"I am glad to see that women are actually going to agitate the matter of the long hatpin," remarked the considerate girl. "I had two beautiful pins presented to me at Christmas and they protruded so far beyond my hat that I simply would not wear them until I had them fixed. I don't approve this idea of wearing a tip on the end of a pin. It wouldn't be pretty, and, besides, it would stick out in the same way the point does now. The simplest thing is to have the pins cut off until the manufacturers begin making shorter ones again. I had three inches cut off my pins at a cost of ten cents, and now you can't see the ugly spikes at all."

SORDID CALCULATION.

"You would rather have an airship than a private yacht?"
"Yes. An airship has its disadvantages. But it's far more economical when it comes to taking friends on a pleasure trip."
