

Wm. Kamphuis, of Dover township, suffered terrible injuries last Thursday morning as a result of being caught by the main belt of a threshing rig. He was evidently in the act of patting on the belt when in some manner he was caught between the pulley and the belt sustaining a compound fracture of the right arm, fracture of the right coliar bone and several ribs broken on the right side. Dr. Wolverton was called to attend the wounded man, and at the present time Mr. Kamphuis is getting along as well as can be expected in view of the many and serious injuries he sustained.
