

LETTER FROM HOSEA

Emmet N D Aug 9 '15

Mr Editor i now set my graseful Form in a chare to let you and the People of Hannaford know that i am on Murseys side of the grave this is a Prosperous year there is the most Monstrous crop in Melean Co that ever was known last week one after noon i thought i would take a near cut to one of my Neighbours and i went acrost my wheat and i couldent see over the top of it and i wandered around all that afternoon and that knight i got lost and had to stay in that wheat field all knight i was all tangled up in the long straw the straw looks more like underbrush that grows in the east O the knight i was lost in the wheat field was one long Dreary Knight when i was at Yale College to finish My Education as a Reporter for a Newspaper i thought i got quite well Posted about the European countries i knowed Russia was a powerful Nation and i knowed England was Powerful But

all i thought of Germany was that they were good for was to eat sower crout and Drink shoopers But by the way they are Hammering around warsaw i think the Rshins that are in warsaw must think by this time it is Rum Rags & Distruction. i see by reading the Enterprise Dr Bensons report there is a quite a few Burths Well they cant beat Melean Co for that for there was one woman that has got twins and another woman came verry near having 2 she came within one of it when i get my Big crop thrashed i dont expect to be rich but i will be what mite be called a Big liver

B i often think of the days when i S was Poor and had to work at any old job once upon a time i was a horses chamber made for walter Richardson But on account of my good sircumstances i will Never be again

From Honorable

Hosea Woodward
