

Work has commenced on the foundation for a 40x90 modern garage building located on the lots between the telephone building and Richardson's meat market. The building will be of sheet iron and asbestos inside and out and will be up-to-date and fire-proof. The men interested in the new enterprise are O. Aaker, D. Larson and H. Cole, all practical experienced automobile men, and with the constantly increasing number of autos in the country there is no doubt but that the repair and accessories business will provide an ever increasing amount of work in this line. They also have secured the agency for the Hupmobile and Chevrolet cars.
