

HIGH SCHOOL NOTES

Mabelle Nelson, Editor-in-Chief

The Seniors have received their class rings and are very well satisfied with them.

The English III class is studying Milton's Map of the Universe. We learned some interesting things about the upper and the lower (?) regions.

The General Science class is having a good time—"Staying after school" sometimes.

The French II class has had several new words added to the vocabulary. These include:

Silver plate (S'il vous plait)

Squeeze-you (suis-je)

Potater (peut-etre)

Loam (l'homme)

Remember April 30th.

The High School students felt more inclined to take a look at Nature than to return to school last Friday, and "Ditch Day" was the inevitable result. The student body assembled at the A. F. C. Garage at 12:30 and 2:00 o'clock found them all on the way to Cooperstown. They had a hard time to secure the necessary cars but formed an attractive (?) procession as they went on their way—some in Fords and others in larger cars. At six o'clock all had returned to town and spent an enjoyable hour seeing the sights of our little village. The only regret was that it did not last long enough.

Only four more weeks and then come the exams. This serves as our goal for the present term; it is something we all look forward to.

Prof. and Mrs. H. V. Ward have resigned their positions as instructors in the Hannaford High School for the term of 1920-21.
