Are You Aware

that in the course of one year the balance of your watch makes 157,680,000 revolutions?

Think of It!

In time the oil gums, produces friction and wears the delicate bearings, destroying their high finish and perfect fit, thus ruining an accurate time piece.

An ordinary machine is oiled daily. Your watch should be oiled once a year.

Let us examine it; an honest opinion from us will cost you nothing.

Alfalfa a Five Point Crop

Alfalfa is a five profit crop as compared to one profit from wheat. 1. The profit from the crop at market value, hay and seed. 2. Profit from feeding crop. 3. Manure applied to land will increase following crops. 4. Prepares land so following crops yield more. 5. Insurance, the most sure of the crops. B. Byron Bobb of Haynes, N. D., says that alfalfa has never failed to make at least one cutting of hay a year; wheat may fail entirely. All these good points of alfalfa should be considered. Alfalfa and live stock is a combination that is hard to beat.—Extension Div. N. D. Agr. College.
