FORTY BILLION GERMS.

A Wonderful Theory That Concerns the Welfare, Happiness and Life of Everyone.

In his quiet and cosy library at the close of a busy day sat a gentleman and his wife, he absorbed in a new book and she in the newspaper. Quickly glancing towa d her husband, she asked, at a certain point in the article.

"John, what is the germ theory?"

"The germ theory--well-yes; just look in the encyclopedia under 'Germ,' that will explain it so much better than I can."

Accordingly his wife opened the book at the word named and read: Grm Theory of Disease-A theory advanced by the ablest and best investigators and scientiste of the times. It supposes the surfa of the earth, the air and water inhabited to a greater or less ex-

at with a peculiar growth of the lowest form of fungi-commonly termed bacteria, whose power of reproduction, under favorable conditions, is so great that a single germ will increase to fitteen million in twenty-four hours' time. and unchecked in its increase would grow to a mass of eight hundred tons, in three days' time, if space and foot be furnished. There is no conditi n under which it can be said to be absent, unless it be from fire or air filtered through cotton-batting in numerous layers. A single drop of water containing a germ, put into water boiled, filtered and thus freed from bacteria, will grow murky in a day or two from the development of new germs When it is considered that it requires about forty billion to weigh one grain, some remote idea can be had of the capacity of germ reproduction.

Annen of Stockholm, Wis., the aggregate weight of which was 2,090 pounds, have just of the capacity of germ reproduction. Professor John Tyndall, in a late work, elaborately treats of the influence of germs in the propagation of disease and charges upon this cause, the inception and development of very many of the ailments injurious to man. Professor Pasteur, an eminent French savant, has carried his original and beautiful experiments so far, and from them deduced such practical results as very greatly to diminish the number of cases of anthrax among sheep and chicken cholera among fow.s,—proving his theory that these are essentially and actually germ diseases. These germs are carried into the system through the lungs, the stomach and possibly the skin, but through the lungs chiefly. Once in the system, they begin to develop, poisoning the blood, invading the nerve centers, distributing the functional activity f the great organs of the body and inducing a general impairment of the vital processes. They are the cause of fevers, rheumatism, bright's disease of the kidneys, pneumonia, blood poisoning, liver disease, diphtheria and many other ailments. Lately Professor Koch, a famous German physician, has proved that consumption of the lungs is due to the consumption of the lungs is due to this cause—the presence of a pe-

When the circulation is bounding, the nerves elastic and the system all aglow with life and energy, the germs seem to develop poorly if at all. But with weak-ened nerves, poor digestion or malas-similation of food or a lowering of vitality from any cause, a change ensues, and in this impoverished and weakened fla-id the gern finds a genial home and develops until symptoms of disease are d.stincily manifested. This is seen in the every day experience of all. The healthy man resists the influences around him and does not take cold, while those whose systems have become weak from any cause readily contract colds. This is on the same principle as the germ theory. The garms attack any weakened spot in the body, and fixing themselves upon it begin their propogation. It is plain, therefore, that it is only by fortiving the weaker portions of the body that the weaker portions of the body that the accession to their subscription, list. germs of disease can be resisted and driven from the system. But this has proved almost an impossibility heretofore, and it has been the study of physicians for years how !- st to accomplish it. Within the past few years, however, a preparation for the past few years, here is the past few years, here is the past few years, here is the past few years, and the past few years, here is the past few years, here is the past few years, here is the past few years, and the past few years, and the past few years, here is the past few years, at the past few years, and the past few years, at the past few years, here is the past few years, and the past few years, here is the past few years in the past few years, here is the past few years in the past few years. The past few years is the past few years in the past few years, here is the past germs of disease can be resisted and past few years, however, a preparation has been attracting great attention, not only throughout the entire land, but among the med cal profession and scientists generally, which is based upon this theory, and it may be safely said, no remedy has ever been found which can so successfully place the system in a condition to resist the germs of disease as Warner's Sale Cure. This article is unroaches, bed-bugs, ants, vernin, chipmanks. 15c. dition to resist the germs of disease as Warner's Sale Cure. This article is un-questionably the best and most efficient that ever has been discovered for this

that ever has been discovered for this purpose, and—
"John, say John! does the encyclopedia advertise Warner's Sate Cure?"
"I should not wonder, dear, it's a grand remedy, and that phamplet we received the other day stated tout Dr. Gun, of the United States Medical Colomo, and the Medical Colomo, of the United States Medical Colomo, and the Medical Colomo, of the United States M dum, of the United States Medical Col-lege endorsed it. At all events the won-derful cares it is accomplishing entitles it to be honorably noted among the great discoveries of the present centu-

However the facts above stated may be, the truth remains, that the germ theory of disease is the correct one and that the great remedy mentioned is the only one which has ever been found that can put the system in a condition to kill these germs before they obtain a hold upon the body, and undermine the life.

The Electric Light and Blondes.

From the E ectrical Journal. Nopody appears to have noticed one effect of the electric light-it is going to make brunettes fashionable again. The white glare is, in a color sense, death to the blonde. The pinkest of them take on little shadows und r the eves and purple tints come into their lips, and their cheeks get ashen. I am speaking now or a natural blonde. The effect upon the artificial bleacher is simply cadaverous But the brunette sparkles under it like the evening star. What a dreadful state of existence the dear enamelled will lead when they can neither go out at day or night! I suppose you know that the hot sun heats the face of the enamelled women, gets so hot as to blister the flesh underneath, which would split the artificial covering. If, then, the ef-ectric light shuts them is at night also, they might as well be enamelled throu h in the old Egyptian style, and put into

a sarcophagus.

Mexican Slaughter of Apaches.

W. H. Stevart, who has returned to Ton bstone, Arizana, from Swisshe m. says the Apaches have been rou ed by Mexican tro ps with great slaughter. Troops had been stationed to prevent the retreat of the savages into the Sierra Madres. The Indians then turned and flet to ward Arizona, closely followed by the 'exicans, who overtook them at the extreme end of Swisshelm, where a running light ensued. The Mexican commander stated that if his troops can commander stated that if his troops bad not been worn out by fighting and torced marches he would have driven the red devils on the San Carlos reservation himself. Stewart said a large body of routed Indians passed his ranche. They were poorly clad. Fully one-third had freezeroes

Suspension of Work on the Canada Pacific.

The surprising report comes from Winnipeg that the Canada Pacific has suspended work for two years, and that the work-men hav-left. At this late hour, when the track has been laid far up the Bow river pass, to within thirty-five miles or so of the summir, it has been disc vered that after all it may be impossible to cr ss via Kicking Horse pass of the Rocky Mourtains. The engineers could not come to any agreement, so they were all called in, and the matter was laid before the general manager and other officials. When it was seen ager and other officials. When it was seen there was but little prospect of an agreement among the engineers on one route. and seriovs consequences might result by further prosecuting work this season, when it was not d-invely known that pass the it was not d-invely known that pass the it was not d-invely known that pass the feasible, it was deemed best to stop all work for two years, and orders were according year out to that effect. In the meantime, the most efficient engineers will be put to ascertain the best route.

Three two-year old hogs, raised by Joseph Annen of Stockholm, Wis., the aggregate weight of which was 2,090 pounds, have just been marked at Lake City, Minn.

Order has been restored at Port au Prince after the loss of 1 500 lives and \$4,000,000 worth of property.

On the stories and the stories and the pass of the worst type headling in the medicine is more than you claim for it, and the pass yeth doubt will write to me E. C. Hawes, Jr. Israelle to me E. C. Hawes, Jr. Israele to me E. C. C. Hawes, Jr. Is it was not d-finitely known that pass was feasible, it was deemed best to stop all work

The Premium Wheat at the State Fair.

Fair.

The premium wheat at the state fair just held at O vatonna was raised by Jacob Hurley of Ortonville, in Big Stone county, Minnesota. It was a beautiful specimer of the hard Scotch Fife, weighing sixty-three pounds to the bushel, and produced the enormous quantity of three bushels from a single quart. It was exhibited in both grain and straw, and attracted more attention than any other one thing on the ground. The size of the kerness the bright stiffstraw, the length of the heads and its enormous productiveness called forth expressions of surprise from all who saw it. Col. John H. Sevens, the veteran agriculturist, was particularly struck with it, and pronounced it the finest half-bus el of wheat he had ever seen exhibited at our fairs. It was the kind called the Staket chewan Fife, a pure variety of the old Scotch Fire, brought down from the Saskat chewan Valley, in Manitoba, six years ago, and acclimated to our state. The original seed has been much improved by careful selection and cultivation, and it is now unquestionably the most productive and test lection and cultivation, and it is now questionably the most productive and test

questionably the most productive and test milting wheat in the world.

Teleproneer Press Company of St. Paul, anxious to increase their subscription list, and at the same time dissemitate so valuable a variety of seed, have purchased a large quantity of it direct from the propagators, and now offer it as a premium on their weekly. Any one sending in a new name at the regular price, accompanied by the cash. viz... \$1.15 for a year's subscription. the cash, viz., \$1.15 for a year's sub-cription, will be emitted to a quart of the wheat, which will be sent to any address, put up in a strong canvass sack, and delivered at

ALLEN'S **Lung Balsam!**

A GOOD FAMILY REMEDY!

-THAT WILL CURE-

Coughs, Colds, Croup,

Dr. Meredith, Dentist, of Cincin it, was thought to be in the last stages of Consumption, and was induced by his friends to try Allen's Lung Balsam after the formula was shown him. We have his letter that it at once cured his cough and that he was able to resume his practice.

University of Markon County, W. Va., writes us that his wife had Pulmonary Consumption and was promounced incurable by their physician, when the use of Allen's Lung Baltant it at once cured his cough and that he was able to resume his practice.

U CONSUMPTION.

Wm. C. Digges, Merchant, of Bowling Green, Va., writes April 4, 1881, that he wants us to know that the Lung Balsam has cured his mother of Consumption, after the physician had given her up as incurable. He says others knowing her case have taken the Balsam and been cured. He thinks all so afflicted should give it a trial.

Wm. A. Graham & Co., Wholesale Druggists Zaneaville, Ohio, write us of the cure of Matthias Freeman, a well-known citizen, who had been affilicted with Bronchitis in its worst foun for twelve years. The Lung Balsam cured him as it has cured many others of Bronchitis. 0 N
