

SEEN BY BRITISH SPECTACLE

Which Enable Us to See Ourselves as Some Others See Us.

Sir Lepel Griffin's book on "The Great Republic" is severely criticised by American papers. It is not flattering to our national pride to have our political life denounced by an Englishman.

Republican institutions have had a trial for a hundred years and so far as outsiders can judge their failure is complete. France under a republic has become a by-word in Europe for weakness and truculence abroad and financial imbecility and corruption at home.

Nothing is more striking than the patience with which the free American citizen bears the insolence of office, the rudeness of ticket collectors, the unnecessary violence of the police, and the general contempt of every petty employe of the government, or private companies, who, one and all, seem to consider the public they serve as a beast of burden, to be beaten or driven at their pleasure.

Nothing is more pleasant in America, or places the civilization of the country in a brighter or more honorable light than the universal respect publicly paid to women by men of all degrees.

The Art of Early Rising.

From the Popular Science Monthly for August.

The proper time to rise, says the Lancet, is when sleep ends. Dozing should not be allowed. True sleep is the aggregate of sleeps, or is a state consisting in the sleeping or rest of all the several parts of the organism.
