Foster gives us some warm weather the first week of June, with a great storm in the Ohio Valley about June 7. This storm comes off the Pacific over Portland way and keeps well to the North, which puts this section in its path. This storm is expected to have great effect upon the spring wheat crops. It will be exceeding hot, great drouth and some storms. The storms may help to save our section together with a promised Manitoba wave on its way to Kansas, where it is to be feared, along meridian 39. June is a trying month and if Foster gets us through the month, with much left, there is hopes.—The Forum.
