draw the line, madam-I draw the line.

The trouble with most of us is that our joys seem to sink out of sight in some inner quagmire, and our pains seem to take root on the thinnest soil and flourish like the proverbial green bay tree. What is the matter with us that a little irritation today can wipe out in a moment all the recollection of yesterday's glory?

"Practical" Arithmetic.

TITLE PAGES.

Invention of Printing.

The most surprising thing in the his tory of the title page is the fact that it was utterly unknown until a few years after the invention of printing. In the days before that great era, when all books were in manuscript, no scribe ever thought of prefacing his work with a separate page or leaf devoted to the title.

When printing took the place of writing, changes came gradually. In many early printed books there was still scope for handwork. Initial letters were left for the "rubrisher," as he was called, to decorate and Illuminate by hand.

As books multiplied this practice, of course, soon died out. Occasionally wealthy and luxurious book own are would employ a skillful illuminate to adorn the pages and margins of a printed book just as in former days manuscripts had been illuminated.

The manuscript practice of surround ing the text with an ornamental border was also often applied to early printed books. The introduction of the title page showed the same mingling of old and new.

Printing was invented about 1450, but no title page, properly so called, is known before 1470. In the earliest examples the title is either, as in manuscripts, given in the first two or three lines of the first page, to be immediately followed by the printed text, or is simply, as it has been called, a label-that is, it consists of a very brief title at the top of a blank page.

There was one curious exception. "Kalendar" printed by Ratdolt at Venice in 1476 has a full title page in the modern style. This remarkable page consists of an introductory poem surrounded on three sides by ornamental borders, with, at the bottom, the place of printing and date-"Venetiis, 1476 and the names of the printers.

But this is quite an exceptional in stance. Such a title page is hardly found again for twenty years and did not become common till about 1520, more than forty years later.

A particularly noticeable feature in many title pages of the sixteenth and early seventeenth centuries is the length of the descriptive titles. Controversial pamphlets and books of travel and adventure especially have titles which are extraordinarily long winded. The whole page is filled with small type, giving an analysis of the contents of book or pamphlet.

Then toward the end of the seventeenth century and through its successor came the reign of the bold and plain title page, and the plain title has lasted until the present day.

In the south of Europe the rosemary has long had magic properties ascribed to it. The Spanish ladies used to wear it as an antidote against the evil eye. and the Portuguese called it the elfin plant and dedicated it to the fairles. The idea of the antidote may have been due to a confusion of the name with that of the Virgin; but, as a matter of fact, the rosmarinus is frequent ly mentioned by old Latin writers, including Horace and Ovid. The name came from the fondness of the plant for the seashore, where it often gets sea-that is to say, sea spray. Another cause of confusion perhaps was that the leaves of the plant somewhat resemble those of the juniper, which in mediæval times was held sacred to the Virgin Mary.—All the Year Round.

Why Many Young Men Fail.

It is the fault and the cause of the failure of so many bright, capable young men that, being put into a certain workday rut, they make no effort to climb or even crawl out of it. They do not seek the work that is not rou tine and go beyond the terms of the bond in search of additional labor in order to attract the approving notice of their employers; they do not go to their posts before or remain at them after the fixed hour; they are content to do enough, and no more than enough, to earn their hire. The life of the average clerk is generally genteel, easy, cleanly. He need not soil his hands or his clothes, and his ambition is satisfied with these pleasant conditions .-Philadelphia Ledger.

Sad State of Poetry. For songs the use of poetry has for some time been abandoned, and words. any sort of words, have been employed instead. With patriotic songs any suggestion of poetry is held to be fatal to success. It is probable that in another ten years some member of parliament will introduce a short bill making the production of any other sort of poem a criminal offense, and it is not impossible that the member of parliament will be a publisher.-Macmillan's Magazine.

Men Repeat, but Do Not Copy. Grant-It is easier to say a good thing than to do a good thing.

Henderson - Very true. But when you say a good thing you are flattered by persons right and left making use of it as if it were their own, but you have few copyists when you do a good deed.-Boston Transcript.

Advantage of Position.
"Hold on!" exclaimed the boy who was under. "Let's arbitrate this thing!" "There ain't nothin' to arbitrate!"

panted the boy on top, pummeling him vigorously.-Chicago Tribune. What Would You Do? People are fond of telling what they

would do if they had \$1,000,000. It's safe to bet that nine men out of ten if they had \$1,000,000 would do nothing. -Kansas City Independent.
