The Ladies of the Maccabees gave a very successful lawn social, Tuesday evening, at the home of Mr. and Mrs. P. E. Nelson. The beautiful lawn was dotted with tables, at which ice cream and cake were served. The receipts of the evening were \$20.50, which will be used for the relief of Maccabee flood sufferers in Kansas. Much credit is due the band boys for the excellent music furnished for the occasion and which added materially to the success of the social.

During Friday evenings thunder storm a man working for Butler & Upson, while standing near the house watching the storm gather, was struck by lightning. It is the second time that he has passed through the same experience, having been struck seven years ago. He will soon be up and around again.

The Hannaford base ball aggregation was too many for our boys in the tussle for the cup. From the time they struck town until they left, they were looking for trouble, and as usual played their "rowdy" game. The visitors made one run in the first, one in the fourth and by a bunch of errors managed to cross the plate three times in the eighth, which was too much of a lead for our boys to overcome. Hannaford was strengthened with players from Dazey and Rogers which was quite a factor in winning the game. Both Sinclair for the visitors and Widlund for the home team pitched great ball. The score: Hannaford 1 0 0 1 0 0 3 0-5 Cooperstown..... 0 1 0 0 2 0 0 0-3

FREEZING CAVERNS.

Subterranean Caves That Are Lined With Crystalline Ice. There are deep cavities and tunneled recesses in the earth far away from sunlight and held in the tight embrace of rocky strata where secret hoards of glittering ice find habitation all the year round. Yet down in these queer places the ice is as pure and crystalline as any that nature maintains in the open air; moreover, it occurs on a truly grand and massive scale.

Imagine thick underground ice walls and floors and craftily assured columns beautiful in shape and color streaming from roof to floor of lofty rock chambers! And under the slow drip, drip, drip of percolating water this same ice learns to fashion itself into cave adornments—frozen water drops, curling slopes, stalactites and stalagmites of fantastic shape and fantastic hues.

Subterranean cold waves, or "glaciers," as they are frequently called, crop up in some 300 scattered localities in Europe, Asia and America, but all, with rare exceptions, whether true ice caverns or grottoes and deep hollows, are confined to the north temperate regions of these continents—that is, to places where there is a sufficiently low temperature at some portion of the year to reach freezing point and render snowfall possible.—Pearson's Magazine.

Philial Repartee. Richard Brinsley Sheridan, who was always distressed for money, was one day hacking his face with a dull razor when he turned to his eldest son and said:

"Tom, if you open any more oysters with my razor I'll cut you off with a shilling."

"Very well, father," said Tom, "but where will you get the shilling?"

A Full House. Lady Guest—Your father is such a hospitable gentleman! He dearly loves a full house, doesn't he? Jack—Well, yes—if it happens to be on his side of the table.—Kansas City Journal.

Throughout every part of my career I have felt pinched and hampered by my own ignorance.—Sir Walter Scott.
