Mr. and Mrs. G. N. Shepherd on Saturday received news to the effect that their little seven year old son was not expected to live. Last June the little fellow went down to Iowa to remain with his grandparents for a month or two. It seems that a few days ago while he was returning home from school with two companions he dropped his book and while stooping over to pick it up a large dog jumped on him and bit him on the face and body, his upper lip being split open. The doctors fixed him up but it was afterwards learned that the dog was mad and the boy was hurried to the Pasteur institute at Chicago for treatment. A letter was received Saturday saying that his life was despaired of and Mr. and Mrs. Shepherd took the afternoon train for Chicago. The Courier sincerely hopes that the reports have been exaggerated and that the little boy's life will be spared to his heart broken parents.

Olaf Solberg met with an experience about noon yesterday that will hereafter make him keep a sharp lookout for the cars. While crossing the track near the depot with a team and wagon he did not notice the freight engine coming along and started to cross over. The engineer could not stop quick enough and the engine struck the rear end of the wagon throwing Mr. Solberg out and turning the wagon over time or two, one horse was also hurt. Mr. Solberg sustained some superficial bruises on the back and got his face scratched up. It was a lucky escape.

I was a student in the shorthand department at Aaker's Business College, Fargo, N. D. for five months and a half when Prof. Aaker offered me a position with Fram Publishing Co., of this city. I accepted the position. It gives me pleasure to recommend Aaker's B. C. It is a fine school where everything is done to advance the best interest of the student, and where positions, to my personal knowledge, have been more than plentiful. Respectfully, Rosella Simenson

A man will run as fast as he can to cross a railroad track in front of a train. Then he will watch it till it goes out of sight. Then he will walk leisurely away. He seems to be all right and probably is. That is a man. A woman in a street car will open a satchel and take out a purse, take out a dime and close the purse, open the satchel, put in the purse close the satchel and lock both ends. Then she will give the dime to the conductor, who will give her a nickel back. Then she will open the satchel and take out the purse, put in the nickel, close the purse, open the satchel and put in the purse, close the satchel and lock both ends. Then she will feel the buckle at the back of her belt.—Ex.
